Interior home décor is a very personal thing. Finding the style of glass that reflects your wants is very important. Our design team understands this. That is why our designs range from simple to intricate, clear to obscure. This is where metals such as zinc or patina come together with textured glass and bevel pieces, thus creating true works of art.

Everyone is different and so are our designs.

Let Trimlite help in creating an interior look that will be a true reflection of your taste and style.

The choice is yours!
Trimlite offers an extensive line of glass options to choose from and the degree of openness or obscurity varies considerably. With each design, we have included a number which represents the “Privacy Level” for that product. Please refer to the guide below.
